FRESHBREW

BRAVILOR BONAMAT | Brewing your coffee SINCE 1948

Traditional
black filter coffee

SERVED PER CUP

There's nothing quite like starting your day with the inviting aroma of freshly ground coffee. Whether in the office, a hotel breakfast area, or an on-the-go location like a gas station, the FreshBrew range ensures the perfect cup of coffee is always within reach.

Brewed one cup at a time with the push of a button, each serving delivers the rich aroma and full-bodied flavor that coffee lovers crave. This approach guarantees a consistently high-quality coffee experience that delights every coffee lover.

Designed for versatility, the FreshBrew range seamlessly blends the tradition of filter coffee with modern convenience. From busy workspaces to bustling breakfast buffets and travel stops, it's the ideal solution for serving great coffee, cup after cup, wherever it's needed most.

Delivering
a perfect cup
EVERYTIME

Paper or paperless brewing
Switch between brewing method in the field effortlessly

Easy cleaning
And maintenance friendly

Whatever your business

The versatile and ideal proposition for breakfast locations, office environments and on-the-go locations.

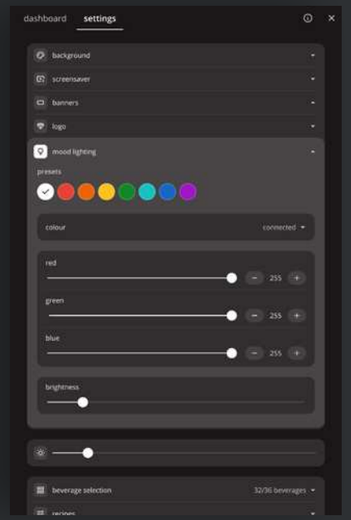

Features & Benefits

Recipe Editor

Featuring a versatile recipe editor. Users can easily adjust key settings like coffee strength and volume, ensuring a simple, user-friendly experience. Empowering operators to tailor coffee recipes to perfection.

Personalisation

Express your brand and make your machine truly yours. Add a branded wallpaper, incorporate your brand colors, or display your company logo—the FreshBrew seamlessly fits into any environment.

Infotainment

Engage your customers or staff by displaying advertisements, announcements, or corporate videos while the FreshBrew is idle or dispensing.

Quick Menu

Keep your machine running smoothly with timely feedback through intuitive icons on the main screen—without interrupting the consumer's coffee experience. Easily manage tasks and check the machine's status by opening the quick menu from the beverage selection screen.

Sliding Drip Tray

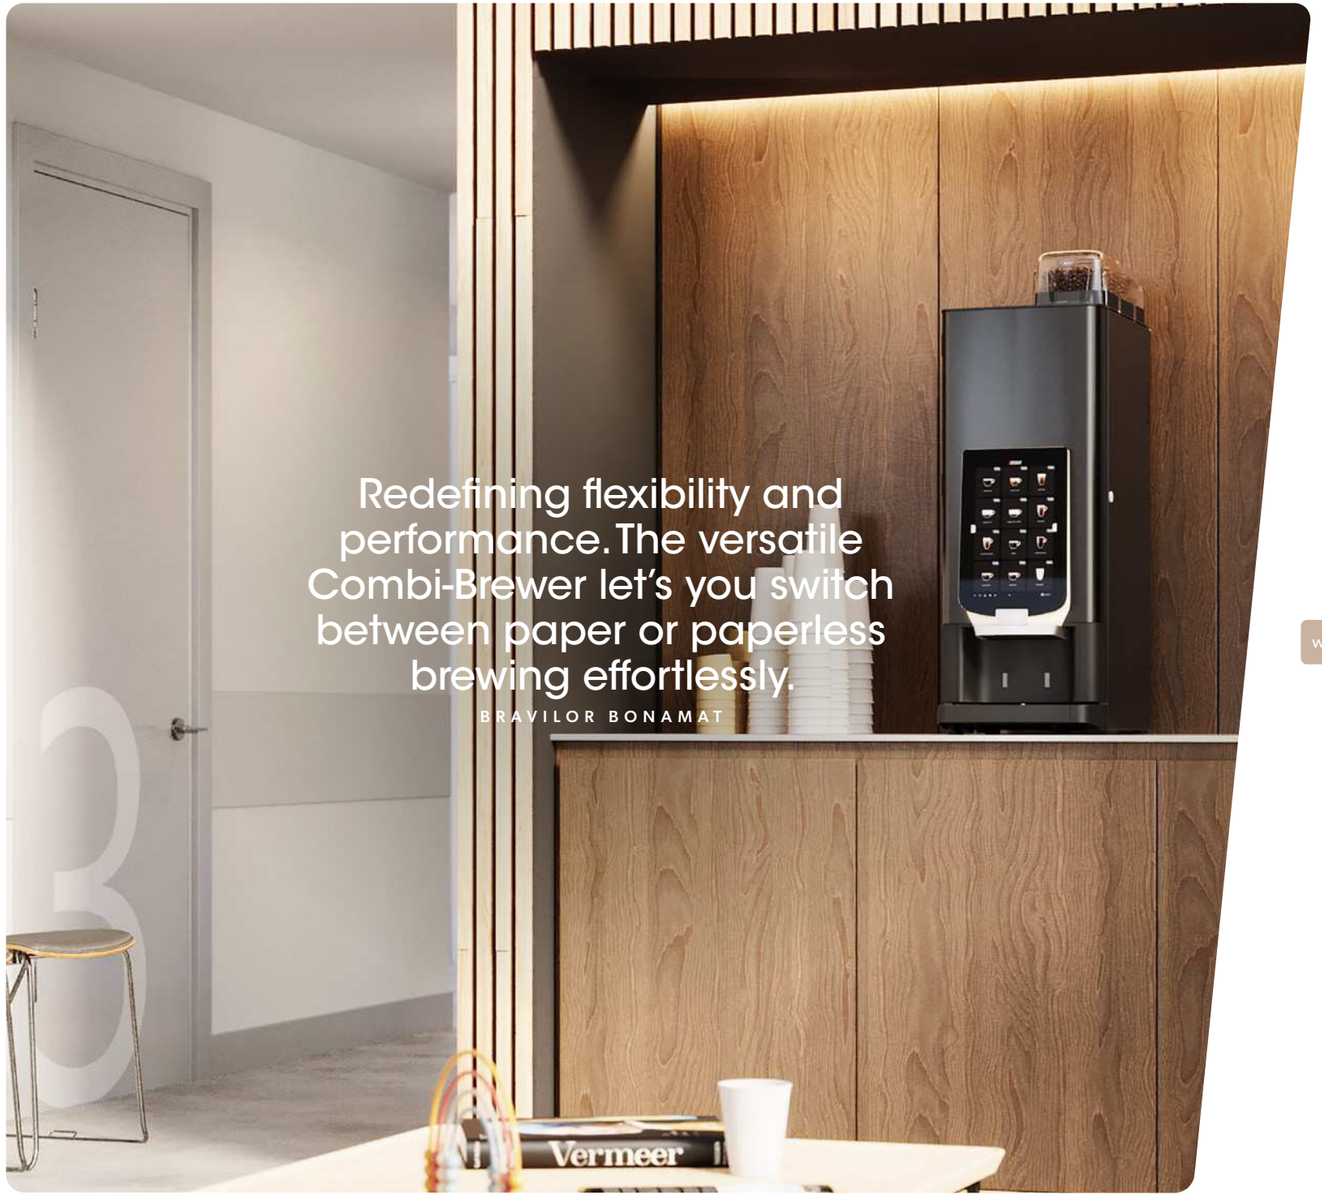

Slide the drip tray underneath the machine with a simple push. Raising the dispense height from 120 mm to 180 mm to allow the easy filling of decanters.

Separate Hot Water Outlet

To prevent cross-flavoring, the FreshBrew features a dedicated hot water outlet, ensuring pure water for tea and other hot beverages. A beverage will only be dispensed when a cup is detected, minimizing waste and reducing cleaning efforts.

Combi-Brewer

Engineered for versatility and performance, the new Combi-Brewer is the ultimate solution for brewing coffee of exceptional quality in single brew cycles up to 480 ml (32g of coffee). While high levels of control over the brewing process ensure precision in every cup, the easy-to-clean design and straightforward installation make it as practical as it is versatile.

Whether for professional catering, large offices, or high-demand environments, the Combi-Brewer delivers reliable, adaptable, and consistent coffee brewing like never before.

Paper or paperless brewing

Nothing is as personal as the taste and flavor of your coffee. Sowhen you prefer the subtle flavours of traditional filter coffee, configure the Combi-Brewer with filter paper with ease and you are all set.

Switch to paperless brewing to enjoy full-bodied coffee. Simply remove the filter paper from the Combi-Brewer, adjust the settings, and the cassette itself filters your coffee. Eliminating the excess waste of used filter paper in your waste bin.

Cleaning and maintenance

The Combi-Brewer is extremely easy to access and can be taken out and disassembled in an instant. Allowing you to thoroughly clean the chute, brew chambers and cassette to ensure the highest level of hygiene.

FreshBrew

The versatile FreshBrew range is designed to cater to diverse coffee needs, offering two distinct variants that combine quality and convenience.

FreshGround

The FreshGround takes coffee preparation to the next level with its integrated grinder, ensuring each cup is brewed from freshly ground beans. This delivers the ultimate freshness and rich, full-bodied flavor that coffee enthusiasts love. Whether it's an office environment, a hotel breakfast area, or a café setting, the FreshGround is perfect for locations where aroma and taste are paramount.

FreshMore

For those prioritizing speed and simplicity without sacrificing quality, the FreshMore is an ideal choice. Featuring a large canister for ground coffee, making it a practical solution for high-demand settings.

With both variants, you can count on the same exceptional quality and reliability that define the FreshBrew range, tailored to fit the needs of any setting.

The FreshBrew range combines the rich heritage of filter coffee with state-of-the-art brewing technology.
